Subject Exit Handling

Description of Problem or Suggestion:

Definition of PGE exit status values, and the mapping of anomalous conditions to those status values is unclear.

Originator's Recommendation

Provide error condition to exit status mappings.

A white paper is being prepared by the Release A DPS team for the instrument teams on the subject of establishing exit code values. It is entitled "Establishing Science Software Exit Conditions for the Production Environment", and has the document number 420-WP-006-001. It is currently scheduled for completion by July 1, 1996. It will address the concerns of the originator by specifying values and ranges of values for the exit codes of a PGE upon termination. This document will be updated for Release B as required.
